

BSc (Hons.) in Data Science and Artificial Intelligence

Mehta Family School of Data Science and Artificial Intelligence
Indian Institute of Technology Guwahati, Assam 781039, India

Dear Students,

This document provides comprehensive guidelines to be followed when attempting tests/assessments as part of the weekly evaluations conducted for the courses offered in the BSc (Hons.) in Data Science and Artificial Intelligence program. Please ensure that you thoroughly review and adhere to these instructions to ensure a smooth and fair testing experience.

Please note that your video and audio will be recorded for the entire duration of the test via the Coursera Locking Browser Proctoring tool. Any form of malpractice is strictly prohibited. Failure to comply with any of the following regulations and requirements will be considered cheating and will result in **ZERO** marks.

Best wishes,

Student Support Team

BSc (Hons.) in Data Science and Artificial Intelligence

Test/Assessment Guidelines

1. Pre-Test Preparations

- 1.1 Close all unnecessary browsers and tabs before starting the test.
- 1.2 Ensure a quiet environment with no interruptions during the test.
- 1.3 Use the restroom before the test starts; you are not allowed to leave your seat during the test.
- 1.4 Dress appropriately, as though in a public setting.
- 1.5 Ensure the room is well-lit with daylight-quality lighting (preferably overhead).
- 1.6 Make sure you have a stable internet connection and an adequate data plan throughout the test.
- 1.7 Use only a laptop or a desktop to take the tests. Charge the device fully and keep it powered before the test. Tests cannot be taken on mobile phones.
- 1.8 Log in early to the Coursera portal to avoid last-minute issues.

2. Verification and test Environment

- 2.1 As soon as you start sharing your screen at the beginning of the test, before selecting any answers, you must show both sides of the printed hardcopy of your IITG ID card for 8-10 seconds in front of the web camera, ensuring that it is clearly visible.
- 2.2 After showing the ID card, you must perform a slow 360-degree scan of the entire room, including the desk with PC or laptop, blank rough paper, scientific calculator, etc. Once this is completed, you may start the test immediately without waiting for any confirmation.
- 2.3 No one else should be present in the room during the test.
- 2.4 If you want to use any scratch/rough paper or calculator during the test, display it clearly during the room scan and during the test.
- 2.5 Ensure no light source is directly behind you, ensuring clear visibility of your face in the recorded video; overhead lighting is preferred.

3. Camera, Microphone, and Posture Visibility

- 3.1 Ensure your entire head and both hands (including fingers) are always visible in the camera frame. You can keep the web camera away from your PC/laptop such that your head and hands are completely visible. If required, attach an external side camera for proper visibility of your posture.
- 3.2 Earphones are not allowed. Show that you are not wearing earphones by turning your head to each side during the room scan.
- 3.3 Do not leave the camera's field of view or the room after the room scans.
- 3.4 Keep your microphone always unmuted.

4. Prohibited Actions

- 4.1 Attending phone calls or messaging during the test is not allowed.
- 4.2 Do not speak during the test. Do not read questions out loud during the test.
- 4.3 Do not seek any sort of assistance from anyone during the test.
- 4.4 Use of mobile phones or notebooks is not allowed.
- 4.5 Use of any form of remote desktop access apps is strictly prohibited.
- 4.6 Playing loud music or singing during the test is not allowed.
- 4.7 Students are strictly prohibited from enabling or using Apple Handoff and any related Continuity features (Universal Clipboard, Airdrop, etc.) during exams.
- 4.8 Any signs of malpractice, such as impersonation (using someone else's account to submit the test/submitting tests on behalf of someone), seeking help, using a mobile phone, using voice assistants, chatting, may lead to zero marks and termination of the test, followed by disciplinary actions. Impersonation, in most cases, shall result in termination from the degree program.
